Director Johan Alvenius
1891–1973

From Vision to Reality

It all began with Johan Alvenius – a pioneer with extraordinary entrepreneurial spirit.

After building one of Sweden's largest car dealerships, he saw a new opportunity in irrigation technology following a trip to Germany in the late 1940s. The result marked the beginning of an industrial venture with global potential.

The Little Red Workshop

Armed with a few hand tools, a bench vise, and a strong belief in the future, the foundation of the company was laid in a small workshop on Rademachergatan in Eskilstuna.

There, the first couplings and pipe components were assembled – craftsmanship that would soon grow into industrial-scale production.

The Birth of Alvenius Industrier

In 1951, AB Alvenius Industrier was officially established, marking the start of a new era.

The company quickly gained recognition for its innovative pipe systems – lightweight, flexible, and easy to assemble – especially within the mining, tunneling, and underground construction industries.

Clients such as LKAB, Boliden, and Grängesberg became long-standing partners.

Expansion and Global Reach

Throughout the 1950s and 60s, Alvenius expanded both in Sweden and internationally. Operations were established in Brazil, Africa, and Asia, where the pipe systems were used for everything from irrigating coffee plantations to handling demanding mining environments.

At the same time, technical development continued. The introduction of spiral-welded pipes enabled high-quality serial production and significantly expanded the range of applications.

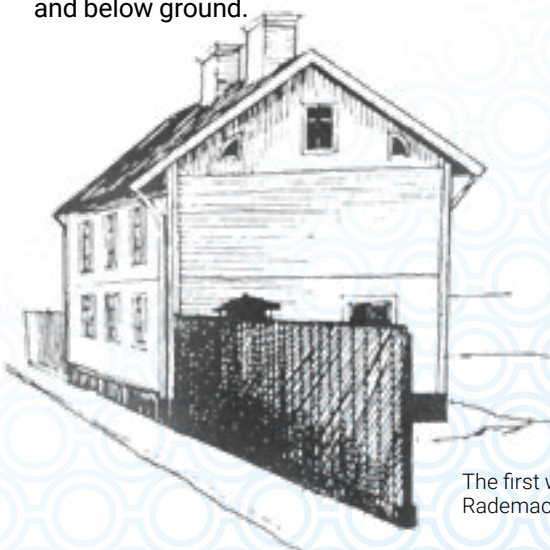

A New Chapter – With the Same Core

In 1990, Alvenius Industrier was acquired by Boxholms AB. While the product range was streamlined, the company's core remained unchanged: the renowned Alvenius pipes, a concept that continues to hold strong in international markets.

Alvenius Today

Today, Alvenius is a global supplier of advanced piping systems for industrial, mining, infrastructure, and energy sectors.

With customized solutions, leading technical expertise, and decades of experience, we continue to deliver value for our customers – both above and below ground.

The first workshop on
Rademachergatan.

Alvenius aims to be a customer-focused, knowledgeable, and experienced advisor, as well as a reliable manufacturer of high-quality, spiral-welded Swedish steel pipes.

We achieve this by being true experts in our own piping systems, combined with a deep understanding of our customers' challenges and needs.

The Alvenius Mission

How We Create Value

At Alvenius, we know that a strong mission is more than just words. It is our internal compass, guiding our decisions, shaping our culture, and driving us forward.

Our mission is clear: to be a customer-focused, knowledgeable, and experienced advisor, as well as a reliable manufacturer of high-quality, spiral-welded Swedish steel pipes.

We achieve this by combining deep expertise in our own piping systems with a genuine understanding of our customers' challenges, goals, and operations. This is how we create real value.

Customer Needs at the Core

We always start with the customer. Through close dialogue, attentive listening, and technical guidance, we develop solutions tailored to real-world needs.

Our pipe systems are often the lifeline of large-scale projects. That's why they must be right from the start and built to last.

Our customers gain more than access to a high-quality system. They gain access to an entire team that stands behind every delivery with knowledge, precision, and dedication.

The reliability we provide empowers our customers to make confident decisions and feel secure in their professional roles.

A Unified Company

We do not view ourselves as a collection of departments. We are one Alvenius, where engineering, production, logistics, sales, and support work together toward a common goal.

We believe in the strength of the whole. Every function contributes to bringing our mission to life.

Whether we are developing new solutions, improving supply chains, or refining internal processes, our direction remains the same: to enhance the customer experience and improve project outcomes.

A Future We Shape Together

Our mission is alive. It evolves in step with our customers, the world around us, and ongoing technological progress.

That's why we continually invest in our competence, our resources, and our relationships.

We know our customers' challenges change over time. Our promise is to remain ready, relevant, and reliable.

Whether you are a customer, partner, or employee, our mission is a commitment to you. We take that responsibility seriously. We do everything we can to understand, support, and deliver.

And every day, we work to become even better together.

Sustainability

A Strategic Choice

We began our sustainability work with the goal of meeting the requirements of the European CSRD directive, as we were initially covered by the regulation.

When circumstances later changed and the requirement no longer applied to us, we chose to continue anyway.

That decision reflects our firm belief that sustainability is a critical component of successful and future-ready business.

Focusing on What Matters Most

Our sustainability efforts are guided by the areas we consider most relevant to our operations and stakeholders.

It is about using our resources wisely, reducing risk, and making a positive impact on people and the environment.

We work long-term and with clear objectives in several key areas.

Our Most Important Resources

Employees

Skilled and engaged employees are essential to our operations. We are committed to creating a safe and inclusive work environment.

Materials and Suppliers

Our production depends on access to steel and other key materials. We ensure this through stable, long-term relationships with our suppliers.

Financial Resources

To support sustainable growth, we rely on both industrial capacity and strong financial resources. Our investments are made strategically, with long-term development as the goal.

Customers

We deliver long-lasting products that contribute to safety and reliability in our customers' operations. This builds trust and long-term value.

Focus on Improvement and Adaptation

In this first year of CSRD-aligned sustainability reporting, we are placing special emphasis on developing our data collection processes, particularly throughout our value chain.

We are also monitoring regulatory changes and adapting our work as new requirements and expectations emerge.

Our view of what is most material may evolve over time, but the foundation is in place.

Read more in our sustainability report, where we detail our initiatives, goals, and progress.

Alvenius Segments and Strengths

Value, Reliability, and Long-Term Partnerships

We have chosen to focus our operations on selected segments in order to offer our customers the best possible solutions.

By working closely with each industry, we build specialized knowledge, gain deep insight into our customers' challenges, and provide clear answers to real needs.

This means we deliver more than just products. We deliver value, reliability, and long-term partnerships.

Mining

Our piping solutions for mining combine low weight with exceptional durability, designed to withstand demanding environments.

Easy assembly and disassembly help minimize downtime and support safer, more efficient operations.

Fire Protection

Fire protection demands reliability.

Our robust systems made from high-quality Swedish steel perform even in aggressive environments, helping protect both people and critical infrastructure.

Tunneling

In tunneling projects, logistics and accessibility are crucial.

Our lightweight and durable pipe systems simplify installation, save time, and ensure operational reliability in complex environments.

Snow Making

For snowmaking applications, we deliver efficient and wear-resistant piping solutions that provide high capacity and consistent performance.

Easy handling and long service life make them ideal for seasonal demands.

Water Supply

We offer strong, fire-safe, and easy-to-install solutions for water supply systems.

Our pipes are well suited for culvert installations in both urban and industrial settings.

Industry

Industrial production demands operational reliability.

Our flexible piping solutions withstand heavy loads, are easy to adapt, and help maintain stability in operations with high performance requirements.

Quality

A commitment to the highest possible quality in every product and process.

Collaboration

Fostering teamwork and cooperation across internal teams, partners, suppliers, and customers.

Competence

Expertise that sets Alvenius apart by delivering superior products and services.

Accountability

We take ownership of our actions, our commitments and our relationships.

Our Core Values

The Foundation of Everything We Do

At Alvenius, our core values are more than words on a page. They guide how we work, influence our decisions, and define how we interact with each other and with our customers.

Through quality, collaboration, competence, and commitment, we are building a company that people want to work with and trust. These values define not only who we are, but also what we strive for every day.

Delivering Excellence from Start to Finish

For us, quality begins long before a product leaves the factory. It is about embedding precision and high standards at every stage, from development to delivery.

We perform quality checks throughout every process and encourage open feedback as a way to continuously improve.

Through internal audits, we identify potential weaknesses early and act immediately.

Our goal is not just to meet expectations, but to exceed them. That is how we build trust, project after project.

Working Together for Greater Impact

We believe the best solutions are born from collaboration. That is why we work in cross-functional teams where diverse expertise comes together around shared goals.

Regular meetings and workshops foster understanding between departments and promote a culture of open knowledge-sharing.

Our collaboration extends beyond internal teams. It includes partners, suppliers, and customers. Together, we achieve results that none of us could reach alone.

Competence as a Competitive Advantage

We are convinced that our expertise is one of our greatest assets. It enables us to offer products and services of the highest quality.

To stay ahead, we invest in lifelong learning. Our employees have access to a wide range of internal and external training programs.

We encourage knowledge-sharing through our internal platform, strengthening our collective expertise and helping us grow as a company.

Commitment That Drives Us Forward

Engaged employees make a difference. That is why we value initiative and provide forums where ideas and suggestions for improvement are welcomed.

By listening to our people, we drive innovation from within.

We also recognize the importance of highlighting contributions that go above and beyond.

That is why we have systems in place to regularly acknowledge and reward the dedication that makes us stronger as an organization.

It is our employees' drive that creates satisfied customers and successful partnerships.

At Alvenius, We:

- **Believe in equal worth**

We show respect for one another and foster a work environment where everyone feels included.

- **Stand united against discrimination**

We act together to counter injustice and actively promote equality in practice.

- **Value experience and expertise**

We recognize that knowledge and diverse backgrounds are key to our shared success.

- **Contribute to a sustainable society**

We take responsibility in our daily work by making conscious choices that benefit the environment and future generations.

Our Guiding Principles

Our Compass in Everyday Work

At Alvenius, our core values are more than just statements. They define how we act when interacting with others, shape the culture we create together, and influence the signals we send to the outside world.

They form a shared set of principles that guide our behavior, decisions, and relationships — both internally and externally.

A Foundation Built on Values

Our values are the foundation for how we think and work. They are rooted in integrity, responsibility, respect, and long-term thinking.

These convictions are embedded throughout our organization and help us act consistently, regardless of role or situation.

Ethics, Morality, and Business Responsibility

Our core values serve as an ethical and moral compass. They guide how we act in various contexts — with colleagues, customers, suppliers, and society at large.

By adhering to clear principles of business ethics such as fairness, accountability, and transparency, we build strong and lasting trust.

Clear Behaviors

Our values are reflected in the everyday behavior of every employee. They influence how we treat one another, solve problems, and take responsibility for our tasks.

By clarifying expectations, we create a sense of security and consistency throughout the organization.

A Culture That Shapes Collaboration

The Alvenius culture is built on our core values and is expressed in a work environment characterized by engagement, respect, and collaboration.

This culture allows us to work toward shared goals while also empowering individual initiative and creativity.

Guidance in Decision-Making

Our values help us make wise, consistent, and ethically grounded decisions that support our strategy and long-term objectives.

When we face everyday choices, our values serve as a shared direction we can all rely on.

The Strength of Living Values

A clear set of core values strengthens unity within the company, enhances understanding of our goals, and fosters a sense of shared purpose.

It also helps us attract and retain employees and customers who share our principles, which is essential for building lasting relationships.

Motivation and Engagement

When employees feel that their daily work takes place in an environment rooted in clear and positive values, motivation and engagement grow.

Our values help ensure that every individual feels valued and inspired to contribute to the company's development.

Made BY Sweden

A Thoughtful Statement

At first glance, our phrase Made BY Sweden might raise questions. Shouldn't it be Made IN Sweden?

It may seem like a language error, but the truth is quite the opposite. Our choice is deliberate, well thought out, and fully aligned with what Alvenius stands for.

We use BY instead of IN because we want to emphasize more than just the place of manufacture. We want to highlight who is behind the product, how it is created, and the purpose it serves.

This is not merely a label of origin. It is a message. It is proof that our product is shaped by Swedish industrial strength, technical knowledge, and a deep sense of responsibility.

A Value Chain That Begins in the Mountain

It all begins deep below the surface in northern Sweden. There, LKAB, a Swedish state-owned mining company, extracts the iron ore that forms the basis for Swedish steel.

The ore is refined by SSAB, another leading Swedish company known for its focus on quality and sustainability. The result is high-performance steel that is delivered to Alvenius in Eskilstuna.

At our facility, the steel is given new life. We refine it into spiral-welded steel pipes of the highest quality using precision, craftsmanship, and technical expertise that has been developed over generations.

Our products are delivered to customers all over the world. We are especially proud that they are also used where the value chain begins, in the mines of LKAB.

A Circular Flow of Swedish Industrial Strength

When our pipes return to the mine to support the extraction of new iron ore, the circle is completed.

A Swedish raw material has been transformed through Swedish industrial skill and innovation. It is then used to generate the next wave of Swedish resources.

This is not just a circular process. It is a real-world example of how sustainable, smart, and strategic collaboration between Swedish companies works in practice.

An Expression of Identity and Responsibility

Made BY Sweden is our way of expressing that every product we deliver represents more than technical specifications.

It carries the values of collaboration, pride, quality, and long-term commitment. It is created by Sweden in every sense of the word.

From raw material to finished solution, every step is grounded in Swedish industrial tradition, innovation, and professional pride.

When you choose Alvenius, you receive more than a Swedish-made piping system. You become part of a broader story. This is a continuous cycle where sustainability, precision, and partnership are at the heart.

This is what we mean by Made BY Sweden.

Since 1951, Alvenius has delivered advanced quick coupling steel pipe systems, earning a global reputation for performance, reliability and innovation.

Our solutions support critical operations in Mining, Fire Protection, Tunneling, Industry, Water Supply and Snow Making.

With engineering rooted in Sweden and a global customer base we understand the standards, environmental conditions and requirements that vary from market to market.

Our international experience ensures that we can support your needs. Wherever you are, we're ready to support your success with smart, durable piping solutions.
